ABOUT

I'm a passionate WordPress Developer with over four years of experience helping businesses and individuals create custom websites that not only look great but also deliver outstanding functionality. Whether it's building a site from scratch, customizing themes, or developing custom plugins, I specialize in translating unique ideas into user-friendly, scalable WordPress solutions.

PROFESSIONAL EXPERIENCE

Cakap

Jul 2024 - Present

Senior WordPress Developer

- Turned Figma designs into mobile-friendly WordPress websites that work well on all devices.
- Built custom WordPress websites without using builders and created special plugins like voucher systems, event tools, and more.
- Developed a career hub application website and customized databases to fit project needs.
- Connected websites to other platforms using APIs and created custom APIs in WordPress for external platform use.
- Used Git during development to collaborate with teams and maintain organized code.
- Worked with Agile methodology to ensure efficient project delivery and collaboration.
- Implemented SEO strategies to improve website visibility and search rankings.
- Conducted A/B testing to optimize user experience and website performance.
- Installed tracking tools such as Meta Pixel, Google Tag Manager (GTM), and TikTok for performance tracking and analytics.

Wondertabs

Feb 2024 - Jul 2024

WordPress Developer

- Developed a website application for a university in Singapore using WordPress with Elementor as the builder and JetEngine for dynamic content.
- Included features such as registration, login, payment, department selection, course management, and more.
- Created a Learning Management System (LMS) for students to access courses, track progress, and engage with learning materials.
- Built custom plugins for student data verification, payment reminders, a helpdesk with ticket management, and other functionalities to enhance user experience.
- Integrated the website with the Flywire payment gateway for secure and seamless transactions.
- Created automations to streamline processes, including payment tracking, student notifications, and ticket updates.
- Integrated HubSpot as a CRM to manage student data, communications, and marketing efforts.
- Created detailed documentation for each function and feature to ensure clarity and ease of use for future developers and users.

Brave Factor

Aug 2022 - Feb 2024

WordPress Developer

- Specialized in setting up WordPress on hosting servers and managing plugins to enhance website functionality.
- Collaborated with design teams to ensure websites aligned with Figma designs, translating colors, fonts, spacing, and other details into WordPress.
- Added and organized content like text, images, and videos, ensuring clear and consistent formatting.
- Created a Career Hub platform to enhance job search and recruitment functionality.
- Developed a Learning Management System (LMS) to facilitate student learning and track progress.
- Built a donation feature to fund a nonprofit organization, enabling secure and seamless contributions.
- Built websites that comply with ADA standards to ensure accessibility for all users.
- Reviewed content for accuracy, resolved errors, and implemented improvements based on feedback.
- Regularly evaluated websites to suggest and apply updates that improved performance and usability.

Deskteam360

Nov 2021 - Aug 2022

WordPress Developer

- Managed and maintained websites for over 20 clients by handling tasks such as creating landing pages, developing custom plugins, and updating and managing content.
- Built custom eCommerce websites using WooCommerce and integrated with Mailchimp for email marketing.
- Integrated payment gateways such as PayPal to enable secure transactions on eCommerce websites.
- Developed a Learning Management System (LMS) for clients to manage and deliver online courses.
- Implemented SEO strategies to optimize website visibility and improve search engine rankings. Provided thorough documentation for clients to ensure clarity and transparency.
- Created automation processes to streamline workflows and enhance efficiency, integrating with tools such as Zapier, Keap, and Integromat (now Make).
- Prepared detailed monthly reports on website performance and updates to keep clients informed about their site's status and improvements.
